Ore.

Route #1

White Salmon Wash  
Feb 944

Dear Kay:

I received your letter today and if George works it right he will not have to go any farther than the local doctor up there. All he has to do is be a little lame.

I think he ought to go ahead with his farming and I think early potatoes ought to be all right if he works it like he did last year and perhaps late ones too I dont think there will be as many potatoes raised next year.

I guess that was to long a trip for you and not much sleep that sure will do one up.

I am glad you are getting some of that beef canned up for next summer.

Yes I heard from Mr Reeves and I think every thing will be all right.

Well the boys are having quite a time with the hay hauling.

Yes I must try and get the machine up to Mrs McKenzie.

Yes I opened canned soup on Tuesday and it is fine but I am saving most of it for next

summer. Kay put Georgie's name on the return on your envelopes when you write me I have help part of the time now and they are nosy.

I am feeling quite a bit better now again and will have to get out and do some fence building before long we are having pretty good weather here now.

You want to be have no place to go but concentration center and they dont allow white folks as I think they are going to try and put Mrs Pyatt of on you they say they are going to pay for it but I know how that will turn out watch out.

I guess that is all this time as ever  
Al.
