PC Shop Moves

One of the most hectic weekends we have endured since the Pacific Citizen was moved to Los Angeles (and we're counting our weekends with the Holiday Issues) was ours this past week when the Shin Nichibei plant moved lock, stock and barrel from 323 E. 2nd St. to 345 E. 2nd

The PC is printed at Shin Nichibei.

St.-six doors eastward.

Moving alone was simple since professionals were employed. But what we hadn't anticipated was the clutter and din that goes to complete renovation of the new premises. Dust and grime still bedeck the printing machinery, galleys, type, etc. The shop is still in jumbles with carpenters, plumbers, electricians, handymen and even

on-lookers. As of Wednesday, when we normally put the pages to bed, we were unable to have | tee. all the type set because the gas and electricity were finally connected to operate the tysesetting machines in the morning.

The shop is still in disarray. We can't locate all we need to lock up the pages.

We'll have to straighten that out after this issue gets off the press. And we shall go to press a day late.

What a way to start Vol- Women's national conference at ume 53!

TV STATION APOLOGIZES FOR ANTI-NISEI FILM

CLEVELAND. - Beore an antici- | Itss and uncomplaining workers: 1961 award.

Belvoir Rd.

Before Toaru Ishiyama, JACL Board Chairman, suspensefully introduced Joyce as the winner, 11 high school graduates, all winning special honors in their respective schools, as well as local college and professional school graduates had been presented to the audience by Dr. Al Goh, JACL Scholarship Chairman.

"The recipient of this scholarship epitomizes the well rounded student who not only did outstanding scholastic work, but who also had time for many extracurricular activities and manifests the personal qualities of aggressivelectuality with warmness, and striving without being selfish, said Ishiyama as he described the prerequisites for the awards.

Miss Shirasawa, a graduate of Colinwood High School, was very active in her school affairs and fashioned an enviable scholastic record during her high school career. She was awarded a scholarship to Northwestern University in Evanston, but is planning to attend Ohio State University. Joyce is an active member in the local

Pacific Citizen Readership Survey

With a paid circulation of 14,000 and an estimated readership of 70,000, the Pacific Citizen now ranks as the leading publication read by persons of Japanese ancestry in the continental United States. The PC Board is constantly striving to improve the paper and at the same time trying to help National JACL financially. . . . Won't you take a few minutes to fill out this questionnaire and return to us in order that we may better assess your interests and needs?

Send this survey to: Dr. Roy Nishikawa, PC Board Chairman 234 S. Oxford, Los Angeles 4, Calif.

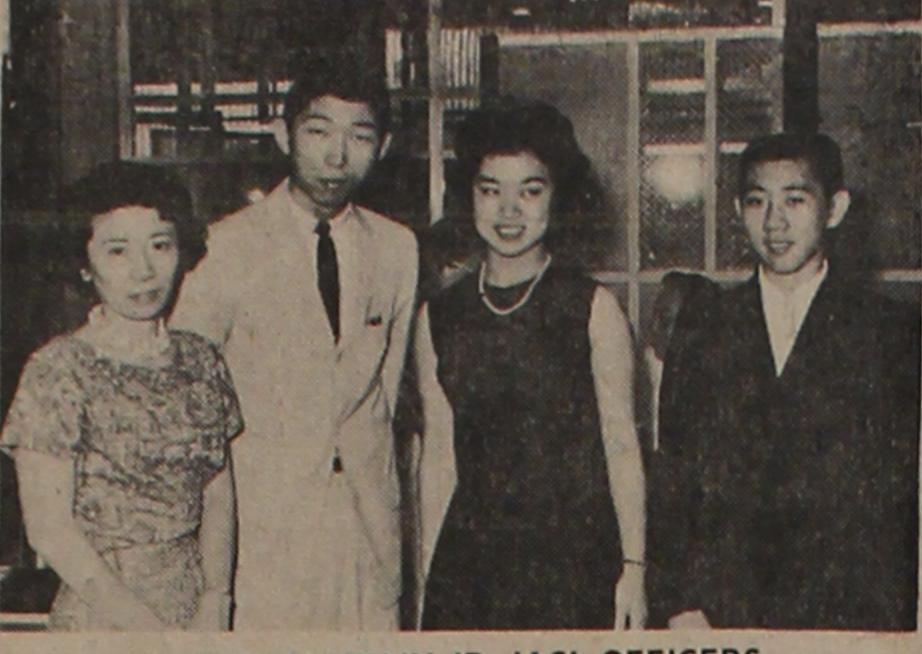

How many people read your Pacific Citizen? 2. Who is your favorite columnist? What do you like best in the PC?

What do you dislike in the PC? Do you take any other Japanese American paper?

Would you be willing to subscribe to PC, even if it might mean in the future, a higher membership fee? 7. Do you personally support the PC advertisers? What do you consider the PC's main function?

Specific suggestions for improving the PC:

This shows a group of Keeler instrument sexors at work in the Hy-Line production

plant located at Johnston, Ia., just outside of Des Moines. This group will run between 30,000 and 35,000 chicks in a day when necessary, but do not work long hours. all chick sexors are doomed?

GENETIC SEXING has loomed on the horizon of the hatching industry. It appears that this could be a competitive tool among major poultry breeders to capture the chick markets. What is so significant about

GENETIC SEXING? Its significance lies in the fact that a handful of geneticists can sex millions of chicks. Actually, they can breed chicks which can be sexed by an external means by most anyone, even by a child A production of 25 per cent of the U.S. total hatch of such chicks might be a possibility within a few years.

less chicks to sex next year? Can you afford to stay in the chick sexing business? This would be difficult. The influence of GENETIC SEXING can be effective and instant. Therefore, you should be concerned. Does this mean the future of

What if you had 25 per cent

No, it does not, but it could for many. For the remaining few this might mean a less amount of sexing with greater expenses and less income. This should be reason for your further concern. This is a new situation .n a

changing industry. In this new and dark situation the Keeler System offers you a new and bright opportunity. You take no chances with the Keeler System. The Keeler System has been proven by us and by our customers of whom some are vent sexors. More and more chick sexors are turning to us and incorporating it in their services. This, too, you can apply to your

long distance away from the base of your operations. You may apply this system to a number of hatcheries. Thus, you will have a new business. The Keeler System permits you to expand your business and still allows you to keep the present

The Keeler System is a lucrative business. It allows you a substantial margin of profit, and yet, it pays the operators better wages than they have ever earned before in sexing, and, at the same time it allows you to offer a competitive sexing price to the hatcherymen. Consider the Keeler System and act now! Now is the time!

Come to the American Poultry & Hatchery Congress in Minneapolis, Minnesota on July 18-20 and visit with us at our Booth "C-28". Learn more about the Keeler System and how you
