KAYOKO-'MY KID SISTER'

To legions of her friends in Chicago, she was called "Tonie"-short for Antoinette, her baptismal name. Within the family and childhood friends at Los Angeles, she answered to "Kayoko" which mean (as near as I can explain it) "a child whose life or world is filled with song or music". PORTLAND, Ore.-The Oregon Non-Profit Organizations, Inc. (ONPO) said it would ask the U.S. Supreme Court to stay the lower court ruling which declared tax exemptions for Elks lodges in Oregon unconstitutional.

The motion is based on an appeal which seeks to give the Elks "intervenor status" in the case and presently pending before the high court. Although the state, defendant in the McGlotten-Falkenstein case, had asked the Portland Elks Lodge 142 to act as intervenor in the cases before it began, the lodge refused to do so at the time but later decided to seek intervenor status and was turned down by the federal court.

preme Court ONPO executive secretary Charles Maylender said his group represents a large number of nonprofit organizations, including the Elks, Moose, Eagles, Knights of Columbus, Masonic orders, American Legion, Veterans of Foreign War, athletic clubs, city and country clubs.

While the Oregon legislature will be asked in January to determine the interpretation given the tax exemption ruling, Maylender fears the court opinion may include all forms of discrimination. "Every one of those non-

Unsuccessful Analysis of Evacuation

PREJUDICE: Japanese-Americans Symbol of Racial In-

When the national voice has risen in shrill cries of hysteria, there have come the soothing tones of Carey Mc-Williams counseling a return to reason. volume, first issued in 1944. The author sought to identify and analyze the phenomena from which the hysteria sprang and thus show the falseness of the premise. Like many another well-meaning intellectual, he adduced that misty misconception "racial prejudice," and identified the Nikkei as a symbol of racial intolerance.

While decrying the "myth | of race," the author pleads for "racial tolerance." With a flash of insight and clarity, he says, "The danger to the future peace of the Pacific arises not by reason of the fact of cultural difference, but as a result of the tendency to rationalize this difference in terms of race."

Though the title of the book is allowed to stand, such musings lead to a modification of view. "We (the government)

. . . premised the discrimination explicitly and solely upon the fact of race or ancestry; more particularly 'ancestry' since the Koreans and the Chinese belong to the same 'race' as the Japanese." So it appears that the Nikkei were less a symbol of racial intolerance than of ancestral

The author struggles mightily to pierce the welter of fraud with which sociologists and others have surrounded in vain. In his foreworld to this reissue, written in 1971, he is still referring to the Nikkei as Japanese.

"More Japanese civilians were killed by the around Honolulu on December 7 than civilians of other ancestry." No one was killed or injured by bombs falling on or around Honolulu because, with one exception, no bombs fell there. Rattled defenders forgot to crank in fuses to antiaircraft shells; instead of exploding among the attacking planes, 39 such shells fell and exploded in Honolulu, killing and maiming civilians.
