Toccata for Teresa

Throughout this past week, all the little things we've have treasured about our little Teresa glistened in a special way-since they are all we have now. She unexpectedly slipped away from us two Saturdays ago.

Joy was hers on Sunday morning, notably at Mass when we shook hands with each other to say, "Peace be with you."

Joy was hers the rest of the week, from Monday to Friday, waiting for the yellow school bus to the Ninth St. School.

And coming home, running toward you with arms outstretched, her powerful hug was: "My, it's good to see you."

When standing or sitting beside her, she might shove or push, a bold gesture that seemed to demand: "Don't you say that."

Happy lines creased her fair face at the sight of clowns, the circus, balloons or a birthday cake, gift-wrapped packages and puppies.

And the most pleasing sound was our clapping of hands, which meant "Well done, Teresa". Clapping back meant: "Thank you."

The dedication of the Ninth St. School staff—and we're sure at every other school of this kind-is genuine. In God's eternal wisdom, children such as Teresa dowment Fund if and when a Federal bureaucracy for the funding. Denver, Colo. More than 300 years ago a mudslide engulfed the Makah Indian whaling village called Ozette on the Olympic peninsula of the state of Washington. At that instant time came to a halt for Ozette under a dozen feet of sodden clay.

For the last six years archaeologists with the cooperation of the Makah tribe had been washing away the clay to uncover the buried village. They have found the houses and their contents in a remarkable state of preservation. The story of this project is told by Richard D. Dougherty and Ruth Kirk in the May issue of Smithsonian magazine.

What is of particular interest to this audience is that the archaeologist have uncovered steel chisels and knives. They know, from other findings, that Ozette was buried before the arrival of the first European and American ships in the late 1700s. Since the Indians had not discovered steel, the scientists think the blades may have come from Japanese vessels that drifted across the Pacific. Further, the authors write, "the high carbon content of the Ozette steel is consistent with the composition of primitive steel known from written records to have been produced in Japan at least as early as the eighth Century, A.D.

If primitive Japanese junks and fishing ful." vessels survived a drifting voyage across the Pacific centuries ago, is it not possible that some of the men aboard them also survived? And is it possible that some them were adopted into Indian tribes, took wives and sired children? Perhaps we are more closely related to the Pacific coastal Indians than we realize.

lehem, Pa.; Columbia, Mo.; Cocoa Beach, Fla.; and Glendale, Ariz., in addition to a few California points. Could it be that Japanese Americans outside the West Coast concentrations have more time to read, and are interested in reading, books of other than a strictly ethnic subject?

While on the subject of books, hardly a week goes by without receiving a telephone call or letter regarding NISEI, which was published in 1969. Most of these communications are fairly routine, but there was a rather unusual letter last week from a young Caucasian. He said his mother had lost her parents before she reached her teens and had been taken in by a California family named Watanabe. However, this correspondent says his mother doesn't talk about her life with the Watanabe family except in the most general terms. After a tour of duty in Japan, he became increasingly curious about Japanese Americans, aligned himself with Sansei at a junior college, and enrolled in Japanese language classes at a Buddhist church. But, he says, he could not escape the feeling of being cut off from his own kin. Now he writes:

"Until I read your book I never really understood what it was that I was looking for. You have helped me fill in a lot of blank spaces and for this I am very grate-

And you're right-it is Greek. I've used it to disguise a subject many people are fearful of talking about because of superstitions; I know many of our parents are influenced by the cultural trait and avoid any thought or discussion about this subject.

"Thanatos" is the Greek word for death. I discovered it as part of the root meaning of "euthanasia" a term coming into popular usage. "Eu" is the Greek word for good; thus euthanasia can be translated loosely as "good death" if there is ever such a condition. The dictionary goes further to define it as the action of inducing the painless death of a person for reasons assumed to be merciful. An

Reparations -

Continued from Front Page on both items. Whites, blacks

and Spanish-speaking were around the sample averages. These preliminary findings were not checked for spuricusness, that is, apparent relationships that might be accounted for by other factors. More complex analyses were nct performed to determine which of the personal and social characteristics account for most of the variation.

The important thing, however, is that three-fourths of the vcters (74 percent) in this sample believe the government made a mistake in placing Japanese Americans in concentration camps, and some two-thirds (64 percent) of the voters in the sample agree that reparation should be paid to the victims of that injustice.

The interviews were conducted and the data ccded and key punched by volunteers from the Wendy Yoshimura Fair Trial Committee. The survey was supervised by Ken Nakamura, Mary Anna Takagi, and Beth Benora. The computer analysis was per-formed by Dana Takagi and Bob Fitzgerald.
