Seattle Chapter
Jiro Aoki, President

April 1969
VOL. VI, NO. 4

ALL MEMBERS INVITED TO ATTEND CHAPTER BOARD MEETING SET FOR APRIL 16

The Chapter meeting, Wednesday, April 16 at 7:45 p.m. will concern itself with administrative matters and operating procedures of and for the Chapter. All committee chairmen are especially asked to be present to discuss criteria and rules for their respective committees. All officers and Board members-at-large are asked to be present.

Over the years there has been much confusion and questions raised about Chapter and National procedures. There needs to be developed a procedural list that each incoming president will have for reference.

We believe that an efficiently run organization is an effective organization. It can also be an organization which can communicate with the Japanese community and the larger community. There is a new challenge facing society and to meet this JACL must become more effective, viable, dynamic and progressive so that all can relate to JACL. --Don Kazama

IMPLEMENTATION OF PROGRAMS IN THE AREA OF HUMAN RIGHTS ARE DIFFICULT FOR IT MEANS THAT VESTED INTEREST OF "STATUS QUO" NEEDS TO BE CHANGED

SEATTLE HUMAN RIGHTS COMMISSION

By Y. Philip Hayasaka, executive secretary

Periodically, various organizations and individuals ask for programs in the area of human rights that will contribute toward the lessening of racial tensions and the halting of attitudes being polarized.

There have been several programs and activities suggested for organization participation, many that are included in the Seattle human rights commission pamphlet "Learn, Baby, Learn." The commission on the causes and prevention of civil disorders report "Race and Violence in Washington State" also contain many suggestions. And many more suggestions are contained in the "Join Hands" organization pamphlet. All of these pamphlets are available in the commission office.

It is when organizations ask for yet more suggestions that the thought comes to mind that perhaps the real question being asked are for programs that are comfortable and safe, easy and convenient, and one that takes but little of their time. If this be the program they seek, then it will not be enough to make any difference.

For many organizations, the implementation, much less discussion of relevant programs appear difficult because the leaders would rather be followers of the rank and file when in this area of human rights, particularly if the members of the organization have vested interest in the "status quo."

Any meaningful program would be quite difficult to implement under these conditions, for the status quo needs to be changed, if there is to be racial equality and justice. It appears that the prevalent attitude today is of material things taking more importance than human things. Many pronouncements are made regarding the value of the human being -- until it threatens any material holdings. The persistent continuation of the myth "property values will decline if non-whites move in" places more worth in property than on humans. So also do all the myths and stereotypes that too many people hold so dear.

How do we break this pattern of a person no longer being judged as an individual and of whole groups of people deliberately placed outside the American society?

We don't do it by being spectators and observers, but we can do it by taking action, whether collectively or individually. We can do it by taking public stands on issues, particularly local issues relating to human rights. We can continue by talking to businesses about their hiring and promotion practices, and if they object, taking the business elsewhere, and publicizing it. We can keep the pressure on by providing service to go house or apartment hunting with other non-whites, and by asking local realtors and apartment owners for letters stating their policy on open housing and publicizing their answers. We can ask public and private agencies to deal only with suppliers that are equal opportunity employers and we can discuss problems of discrimination with local public human rights agencies. We can cooperate with these agencies on ways to assist, and if no such agency exists, we can ask city authorities to establish one. If one does exist, but lacks budget or authority, we can ask city authorities to strengthen it.

By then, and by the use of other suggestions contained in pamphlets mentioned before, other activities to follow may become clearer.

There's an old saying about the journey of a thousand miles, but if you're looking for the road map that spells out in detail what's going to happen every step of the way, . . . forget it. You may be part of the problem.
