# PRESIDENT'S MESSAGE

by Sam T. Shoji

I take this opportunity to welcome you a new year with the Seattle Chapter J.A.C.L. After having experienced a great year of activities under the leadership of Don Kakagawa, I will have a hard act to follow.

As we involve ourselves in local, state and national affairs it becomes quite evident that J.A.C.L. has an important contribution to make if we are to get our due share. During recent years leaders in our J.A.C.L. have contributed greatly to educate and sensitize the general public about minority affairs as it relates to Asians and other groups. We have gotten some rewards for all these efforts, but the work is not done. We have a long way to go.

With the help of the members of J.A.C.L. and other in the Asian Community I hope that we can make further strides in our struggles for equality among all those who comprise our community. We are still hopeful to hear news about our proposal for a Japanese Cultural-Service Center. We are full steam ahead on the Pride and Shame Exhibit and then there is the National J.A.C.L. Convention to be held in Portland, Oregon next July. Seattle Chapter will be kept busy and your cooperation will be needed in many ways.

As the President this year I hope you will feel that I am representing the Seattle Chapter in a manner that is productive and worthwhile. Do let me hear from you.

## U.W. STUDENTS PLAN "LANDLORD CRITIQUE"

University of Washington students, who the past few years have issued "Course Critiques" on their professors, now will turn their attention toward another pet student peeve -- the landlord.

The Student-Tenant Council, a newly formed group by the U.W. student-body government, is planning to keep a file of complaints on individual landlords dealing with students and make it available to prospective student-renters.

Landlords will have a chance to respond to the complaints, Wayne Tanaka, a member of the council's executive committee, said. Tanaka said one of the purposes of the file will be to help point out which landlords seem continually to be the target of complaints by students.

"There is no reason for students to walk into a lease blindly," Tanaka said.

The second-year law student said that the files might also be cross-indexed to show ownership of a particular unit simply by knowing the address.

by Shosuke Sasaki

(Editor's Note: Shosuke Sasaki who had been living in New York after World War Two is now a resident of Seattle and is on the Seattle Chapter board. Sasaki made this presentation Nov. 16 to the Washington Library Association meeting and its Social Responsibility Round Table.)

When the abbreviation "Jap." first began to be used by Americans in the 19th century, the Japanese made no objections. Starting around the beginning of the 20th century, however, with the use of the term "Jap" by certain Pacific Coast newspapers in their anti-Japanese hate campaigns and with continued useage by the American press through the middle of this century, the term acquired exactly the same significance to the Japanese as words such as "Kike," "Wop," and "Nigger" have for Jews, Italians, or blacks. The use of atom bombs and concentration camps against the Japanese is not likely to be repeated, but there have been disturbing indications in the past three years that there are persons in this country who desire a revival of ill-will and hatred between the peoples of the United States and Japan. For such a deplorable goal, a widespread revival in this country of the use of the term "Jap" would be highly effective.

#### Merriam's Interpretation

Americans of Japanese descent have recently been shocked to discover that the G. & C. Merriam Co., in their Webster's New Collegiate Dictionary, have decided to lend their seeming approval to the use of the term "Jap" by defining it simply as an abbreviation of Japan or Japanese. All protests have been brushed off with the specious excuse that G. & C. Merriam Co. has defined it as an abbreviation and not as a noun and that the definition, therefore, is correct as it stands and needs no change. They state that their unabridged dictionary carries it as a noun with the qualification that it is often used disparagingly, but that the lack of sufficiently frequent useage warrants the exclusion of such definition from the Collegiate edition. They choose to ignore the fact that most people do not bother to consult an unabridged dictionary if a seemingly adequate definition of a word appears in a "collegiate" type dictionary.

It is important to note that, in the Webster's New Collegiate Dictionary's definitions of other derogatory epithets, appropriate warnings to users of such terms have been attached. The definitions of "kike" and "nigger" are followed by the phrase "usu. taken to be offensive." The definitions of "wop" and "gook" are followed by the phrase "usu. used disparagingly," and even the definition of "Chinaman" is followed by the phrase "often taken to be offensive." Only the term "Jap" is defined as an abbreviation for Japan or Japanese with not the slightest hint to the dictionary user that the word is highly offensive to the Japanese.

#### Harm from Continued Useage

The definition as it now stands in Webster's New Collegiate Dictionary and also in Webster's Intermediate Dictionary will serve to mislead countless Americans into innocently using the term and unintentionally creating resentment and ill-will among the Japanese. The definition will, of course, delight the twisted minds of racists who know that the term is offensive and who are eager to see the term used wherever possible. If the Japanese were politically and economically unimportant, the editors of G. & C. Merriam Co. might be allowed to rest harmlessly in their stupidly complacent attitude toward their defective definition of the term "Jap." Unfortunately for such an attitude, the Japanese have become a major industrial power and a major customer for American products. Many parts of the American economy depend on purchases by the Japanese for their prosperity. American can no longer afford the luxury of needlessly insulting them. The publishers of Webster's New Collegiate Dictionary by seemingly sanctioning the use of the term "Jap" are in effect promoting the use of an offensive epithet even by those who would never use it if they knew the truth. The possible resulting harm to the interests of the people relying on the dictionary's definitions and to the interests of the United States as a whole are too serious to allow the matter to go unchallenged.

The reactions of the editors of G. & C. Merriam Co. are those of a stubbornly stupid bureaucrat who can follow only his narrow interpretation of what he thinks are the "rules." Their attitude is not that of conscientious editors of a truly trustworthy guide to correct word meanings and usage. Indications of disapproval by educators, librarians and others by withholding the purchase and use of Merriam-Webster dictionaries appear to be the only way to bring about the correction of misleading definitions. Fortunately, there are at least three other good dictionaries of similar size which clearly indicate the offensive nature of the term "Jap." They are the Funk & Wagnalls Standard Collegiate Dictionary, The American Heritage Dictionary of the English Language, and the Random House College Dictionary. I urge their selection cover the Merriam-Webster dictionaries wherever possible.
